

# UNITED STATES PATENT AND TRADEMARK OFFICE - OFFICE ACTION

## FINAL REJECTION

Application No.: 15/987,654

Claims 1-5 are rejected under 35 U.S.C. 103 as being unpatentable over Nguyen (US 7,444,555) in view of Park (US 8,555,666).

Nguyen explicitly teaches a magnetic locking mechanism for a container closure, and Park explicitly teaches applying such a mechanism to a portable drinking vessel to prevent accidental opening during transport. Park provides an explicit motivation to combine, clearly teaching that combining a magnetic latch with a portable bottle closure reduces spillage. One of ordinary skill in the art would have had a reasonable expectation of success in combining these known elements according to their established functions, and the combination merely yields the predictable result of a sealed, spill-resistant container. Claims 1-5 are clearly and explicitly taught by the combined references.
